**Appeal to the student community**

This is regarding the student organisations' banners and posters. Recently, the undersigned received a complaint about the organisation's posters being pasted onto other organisation posters where the events are proposed to be conducted. This is an unhealthy trend in the university system as the university represents social and cultural diversity, where every student organisation and individual student must respect each other.

As you are aware of the potential social and cultural disturbance due to the disrespectful acts towards the organisation's banners and posters, I appeal to all the student organisations and student community to refrain from disrespecting the posters and banners of each other's organisation in any possible way.

Any such disrespectful act attracts stringent action against those students who have been involved in these disturbing activities.

**Modalities for the display of the banners/ posters:**

- The student organisations are allowed to display the banners/ posters only for three days for any event, including one day before and one day after.
- If the concerned student organisations do not remove their banners by the next day of the event, the security department will remove them.

I seek your continuous cooperation in maintaining peace and tranquillity on the campus.
